

Release Notes

Firmware Version(s):

V1.3.26_3.92_2.19

Release Date:

31 October 2022

Applicable Models:

TAO1PRO_S

Changes/Fixes/Enhancements Included:

- *UPDATE:*
 - SDI input supports deinterlacing
 - After the HDMI output detects the monitor, the LCD screen no longer displays the preview signal source, only the background image is displayed.

Note: TAO1PRO_S hardware V1.0 does not support de-interlacing and is not compatible with this version of the firmware. Please confirm whether the TAO1PRO_S is V1.1 before upgrading.
