

For the upgrade please prepare **a U disk**

Upgrade steps:

1. Connect a wireless keyboard and mouse;
2. Copy the above firmware into the U disk, then connect to T1 USB port;
3. Using mouse copy the firmware to the T1 desktop;
4. Right-click the mouse, select the "open terminalhere", to enter into the terminal;

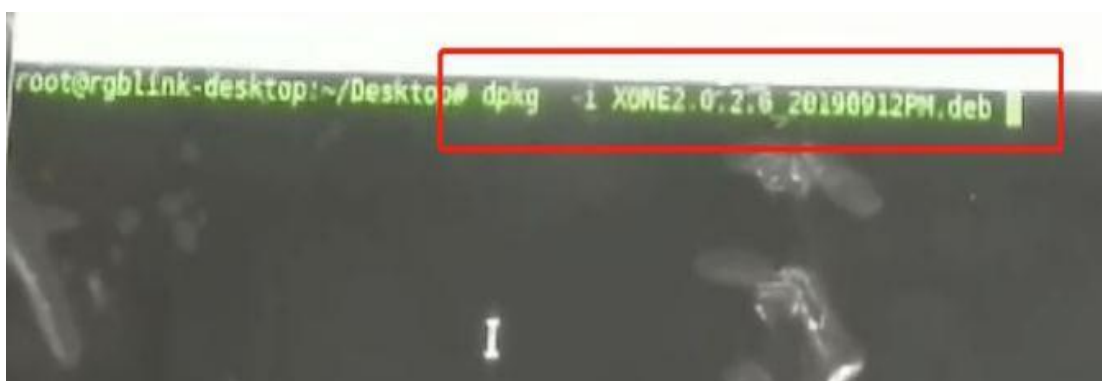

5. **Uninstall:** Using keyboard enter command:" dpkg -r xone" ("dpkg" + keyboard blank+"-r" +keyboard blank+"xone") , then press the keyboard "Enter", to uninstall the old XPOSE;

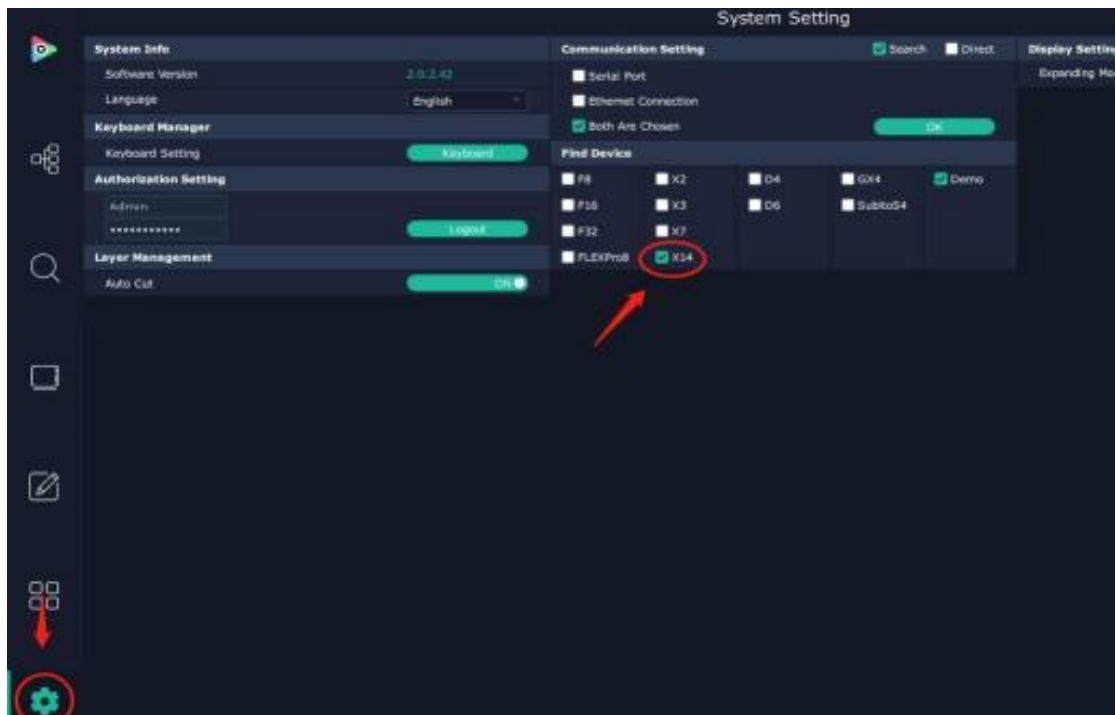

Install: After that, enter command:" dpkg

-i XPOSE20ForT1_2.0.3.4_20200314PM.deb" ("dpkg" +keyboard blank+"-i" +keyboard blank+firmware total name),

please notice that all cammands are lowercase

6. After all above steps, then enter into new XPOSE and select the device type in "System Setting".

7. Start to connect and control.

About the above steps, any problems please let me know.
